FOREWORD

Welcome to LaBatte Simmentals 41st Annual Spring Bull & Female Sale, Friday, March 5th, 2021 at Johnstone Auction Mart, 4 miles west of Moose Jaw on #1 highway.

We would again like to thank all the bidders and buyers from our past sale. Your continued support is much appreciated. As I write this foreword mid-January, we are just getting started calving, the weather has been warmer than normal but with much more wind than I've ever seen. We've just had the worst wind storm in the winter pass through southern Saskatchewan, doing millions of dollars of damage. We had quite a bit of damage but not nearly as much as some. Mother Nature can be not nice at times. It's been quite the times since our 2020 bull sale with Covid 19 taking on the world. It has changed the lives of many and changed how people do business. We're so lucky to be in Agriculture as it hasn't affected us like some other industries. Lucky to live where we do, in the wide open spaces, doing what we normally do every day. Cattle prices remain fairly strong with those big Simmental cross calves bringing lots of dollars per head, replacement Simmental heifers topping the bred heifer sales, and record prices for some of the grain commodities these past months. We need to forge ahead and be thankful for what we've got. I think the world appreciates a little more now the agriculture industry that produces food for the world.

We welcome again as guest consignors East Poplar Simmentals, Kyron & Kelsey Manske. This young couple are doing a great job with their program. They're a pleasure to work with and are just really good people. They will be offering about 20 red and black bulls of high quality in our 2021 sale.

In our own offering this year, in the black division, we will be selling the first sons off the \$92,000 IPU Bentley 81F bull that was our high seller in our 2019 bull sale, selling to Jay Dawn Farms, AB. We kept some "in herd" use semen on him and are very glad we did as his sons and daughters are outstanding. Also featured in the black division are sons off of 81F's sire, Wheatland Bentley 630D. They are, again, very good. In the red division the first sons of WLB Encore 443F, the high selling bull at WLB 2019 bull sale, will be offered. He is a dark red son of the mighty Blockbuster bull. Encore sons are dark red, have lots of performance, hair and style. Also some of the highlight red bulls are sired by SVS Betts 808F, a Champion show bull that really adds thickness and performance to his progeny. In the offering there will be a few calving ease bulls sired by Black Gold Approval and IPU Dillinger 80B. The Fullblood division is headed up by our homozygous polled bull, Sunny Valley Canon 86E, who we jointly own with Hoegl Livestock. His sons are polled, stylish and good. And, again, there will be some really good Black Gold Elevation sons that are cherry red and full of meat. The heifer division will be headed up by daughters of Bentley 630D, IPU Bentley 81F, Liner 56U, Betts, Brooks and Encore. A really good group of high quality heifers sired by prominent herd sires.

And as a special lot this year we will be selling six embryos from the great IPU 52N Ms Pocahontas 2Y cow. Three embryos by R Plus Yuma 9087G and three embryos by SVS Betts 808F. We feel this is a real sale feature.

Again, we invite you to our 2021 Annual Bull & Female Sale, March 5th at Johnstone's. The sale will be a live auction, same as usual. We encourage you to come look at the bulls prior to the sale at the farm or a day or two before the actual sale at Johnstone's. The bulls will be there for viewing Wednesday and Thursday before Friday's sale. If you don't feel comfortable coming to the sale it will be carried on the internet through DLMS. If you need help getting approved for bidding call Mark Shologan at 780-699-5082. If you have any questions on the offering call myself at 306-815-7900 or Kyron at 306-267-7530. We can try to answer your questions and go over the bulls with you and recommend which bulls we think would work for you and your program. Or call any of the knowledgeable sales staff to evaluate the bulls and heifers for you.

P.S. The grandkids are all doing well. Going to school, wearing masks, full of energy and healthy. There is essentially no sports this year so they're out on their ponds by their yards skating and making their own fun. The LaBatte boys have a new puppy so she is keeping them busy.

Sale Headquarters

Heritage Inn - 1590 Main St. N., Moose Jaw, SK
South of the overpass at the junction of #1 and #2 Highways
Telephone: 306 693-7550 306 693-1242 (ask for rooms reserved for LaBatte Simmentals)

Health

All bulls will be scrotal measured and palpated. Bulls over 12 months of age at time of testing will be semen tested. **Bulls under 12 months of age at time of testing will be semen tested prior to delivery.** Weights will be posted sale day. All bulls and heifers were given CattleMaster 4, Somnustar PH and Fortress 7 in June and boosted with same in September. All were treated with Ivomec Pour-on in September and January.

**"Sight Unseen"
Purchase Program**

If you are unable to attend the sale but are interested in our bulls give Barry or Kyron a call and they will personally go over the bulls and your program with you. They will recommend which bulls they think would meet your satisfaction and refer you to one of their sale staff.

In-Herd Semen

LaBatte Simmentals & East Poplar Simmentals reserve the right to collect semen on any bull sold through this sale. The semen collection will be at the seller's expense and the buyer's convenience. Any semen collected will be for in herd use only.

Delivery

At the buyer's option and risk, LaBatte Simmentals and East Poplar Simmentals will take purchaser's bulls home, feed them under their management and deliver them FREE anywhere in the prairie provinces to your nearest central location. We will do our utmost to deliver them right to your yard. Delivery will take place between April and the middle of May. For bull buyers outside the prairie provinces, bulls will be delivered at a reasonable charge. The bulls are the property of the buyer as soon as they are sold. Therefore, buyers must insure their animals for the time they are at LaBatte Simmentals and East Poplar Simmentals. The heifers will be delivered as soon as possible after the sale. Also for our **U.S.** buyers that live in the Dakota's and Montana, we offer free delivery to central points and if possible right to your yard. We look after and pay for all paperwork crossing the border and do offer a sight unseen purchase program.

US Delivery

If you are unable to attend our sale, please join us by viewing the sale live online at www.dlms.ca. For more information and help getting approved for bidding, contact **Mark Shologan 780 699-5082**.

Guarantee

All animals will carry the standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchase price of the animal.

Terms & Conditions

The sale will be conducted under the standard Johnstone Auction Mart Ltd. Terms & Conditions.

Accidents

Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

IPU APPROVAL 7H

HOMO POLLED. We're going to start off this year's bull sale with a couple of calving ease prospects. This Approval 7H bull is dark red, moderate, stylish, very smooth made through that front end and has a great hair coat. His mother is a beautiful made, great uddered female from Ultra Livestock's Keepsake cow family. He has an 80 lb birth weight, was born unassisted and, with his smoothness throughout his length of body, we think he could be the calving ease bull you're looking for.

IPU APPROVAL 10H

HOMO POLLED. This is a really impressive Approval son. He has always been one of our favorites. He's dark red, moderate, stout, has lots of rib and middle, big testicles and a great disposition. He's out of a first calf heifer who happens to be a direct daughter of Pocahontas 68M. We have four Captain Screams out of 68M and they are going to be producers like their mother. This bull had a short gestation of 278 days, an 86 lb birth weight and is the spitting image of this sire. He had an actual weaning weight of 910 lbs, out of a first calf heifer that's pretty good. Lots of potential in this Approval son with his pedigree, structure and balance.

HOMO POLLED. A really nice made, dark red, SVS Betts son out of a really good Horizon daughter who just calved a full sister to this bull as I write this footnote. His dam has never missed, having 7 consecutive progeny. Bulls have gone to Frischolz Farms, SK and Spier Holdings Ltd., SK and daughters to East Poplar Simmentals and Blooming Prairie Simmentals, ND. This 15H bull is really stylish and attractive. He would sire some great replacement heifers.

IPU BETTS 21H

HOMO POLLED. This is definitely one of our feature bulls. He is sired by the great SVS Betts 808F bull that is siring some of the best Simmental progeny in the land. He adds performance and muscle and style. He's breeding true to his pedigree with the Grand Champion Captain Scream his sire and the awesome WFL Red Sage his dam. 21H himself is full of muscle, is deep quartered, has lots of rib and is loose made and structurally very good. He has that herd bull presence about him and a great future ahead of him.

HOMO POLLED. A really good Encore son out of a beautiful uddered Spartan daughter who is one of the favorites around here. Encore has left us some really good bulls and heifers in his first calf crop. He sires them dark red and good haired with lots of performance and style. This Encore 25H is soggy, loose made, has lots of depth of rib and a great hair coat. He would sire those soggy, hairy steer calves that top the markets.

HETERO POLLED. A meat machine! That's how I would describe this Approval son. He was the #1 indexing bull in a group of 68 contemporaries. He had an actual weaning weight of 980 lbs and an adjusted weaning weight of 912 lbs. He has a great set of EPDs from calving to performance to API and TI. He's mothered by a 68M daughter, Pocahontas 39F. He is a full brother to Lot 2 by pedigree. They are very similar in type; thick, deep, moderate, have big testicles and are full of muscle.

We missed testing this bull for homozygous polled somehow but he has a very good chance of being homo as he has many homozygous polled bulls in this pedigree. Again, another candidate for the heifer pen. He is in the top 3% of the breed for calving ease and the top 4% for birth weight. He's very smooth made, has a 78 lb birth weight himself, was born unassisted out of a first calf heifer and had a 281 day gestation. He's heifer approved.

HOMO POLLED. Another really good Encore son out of Pocahontas 2D. She's a Vegas daughter out of the great Pocahontas 105L cow. 2D has quite a track record behind her already. Her first calf, Pocahontas 15F, sold in the 2019 Simmsational sale, our high selling bred at \$28,000 to Mader Ranches, Wilson Stock Farm and Bohrsen Marketing. Her next calf sold in last year's bull sale, an IPU Lieutenant son, to RSF Simmentals, a great commercial operation at Turtleford, for \$16,000. And now this good WLB Encore son. 35H has good frame, is deep and loose made, has good muscle, is long and good haired. He'll raise the right kind whether males or females.

HOMO POLLED. Another feature bull this time sired by WLB Encore. He's very stylish, long and thick made with a great hair coat. He has that herd bull look about him too. His mother is a very good IPU Specialist daughter that raised one of the high selling bulls in our 2019 bull sale, a Brooks son, selling to one of the prominent commercial operations in the province, Diamond K Cattle Co. at Maple Creek. They have one of the most successful bred heifer sales in the country. Every year in December they have their Rock Solid Bred Heifer Sale. Diamond K sell about 165 bred heifers in it, reds and red baldies, many of these heifers are sired by LaBatte Simmental bulls. If you're looking for top quality heifers it's a must attend sale. We think Encore 52H is a bull with a lot of future in him. Whether breeding purebreds or good commercial cows, he will get the job done.

HOMO POLLED. A real nice son of Encore and a really nice Sheriff daughter. These Sheriff daughters make really nice cows. 159E's first calf sold in Simmsational this past December, a really good Black Gold Approval daughter. Our grandson, Jory, was going to show her in 4-H. They did a virtual show because of Covid and she was Champion Simmental Bred Heifer and Overall Reserve Grand Champion. She sold to Triple R Simmentals, Carman, MB. The 92H bull is dark red, smooth made and has great hair. He had an actual weaning weight of 910 lbs. He can add the pounds to your calf crop.

HOMO POLLED. Here's a really soggy made Bentley son with a red hair coat. Something a little different in pedigree. His mother is a beautiful uddered, R Plus Reload daughter. This Bentley bull has been one of the favorites all year. He's so loose made, deep bodied, thick, and has a great hair coat. He would sire those calves that would excel in the feedlot and make the feeder and producer money.

HOMO POLLED. Another one of those Approval – Captain Scream – 68M combinations. So by pedigree he is a full brother to Lot 2 and Lot 9. All three of these bulls are similar in type and quality. They're moderate, have really big butts and large testicles, are smooth made, dark red and are excellent pedigreed. If you are looking for a group of bulls, it would be a great idea to put these three full pedigreed brothers together and add them to your bull battery. They would put some meat and muscle in your calves along with some consistency in type.

IPU 2Y'S LIEUTENANT 114H

HOMO POLLED. This Lieutenant son is a full brother to the Lot 13 bull. Both are transplant calves out of IPU 52N Ms Pocahontas 2Y and IPU Lieutenant 24E. We also have a full sister in the keeper pen at home, a heifer we treasure as 2Y hasn't given us many heifers. She is just the third female that we've ever had. These two Lieutenant bulls are very similar in type – thick, deep, correct and lots of length. What a set of calves these brothers would sire.

BW: 98. AdjWW: 809.

HETERO POLLED. We were pretty excited when we saw this calf born on our calving camera. Dark cherry red and mothered by the only Pocahontas 2Y daughter we have in production, a beautifully uddered, Spark Plug daughter. Her first two calves have come to the bull sale, In last year's sale a good Approval son sold to our good customer, Wayne Petterson at Ogema, SK and now this cherry red, stylish, smooth made, Encore son. He would sire some remarkable replacement heifers and great feeder calves. He also possesses a great set of EPDs, being above average in 11 of 13 traits.

IPU 77D'S BETTS 142H

HOMO POLLED. A meat machine is what 142H is. You've got to stand behind him to appreciate the top and meat and muscle he has. He's been one of the standouts from day one. You don't see many bulls with the quarter that he possesses. His mother is an excellent Muirheads Broker 221Z daughter out of the Lotto 72A cow that produced the \$30,000 Priority daughter that sold in last year's sale to KT Ranches. As a bonus, he has a partial white blaze on his head, he's homo polled and homo good. What a set of calves he would sire.

*Congratulations Wade and Leah!
 Leah arrived in Canada in December. Wade waited a little longer in life to find his bride but I think the wait was worth it. Leah is a beautiful lady and we wish them many years of happiness.*

IPU-403P'S LOTTO 148H

HOMO POLLED. Well, every once in a while you get lucky and that's what happened when we found we still had a couple of Springcreek Lotto – NUG Pashmenia embryos in the tank and we put them in the spring of 2019. And wow! We got the Lotto 148H bull calf who is one of the feature bull calves in our sale this year. He's a full brother to the Red Lotto bull that Westway Farms purchased in our 2014 bull sale and that has done such a great job for them with many, many progeny registered off him. The NUG Pashmenia 403P cow that we purchased from Maxwell Simmentals as a bred heifer has done great things for us. She was a black baldy cow that produced many outstanding progeny. This excellent, deep, soggy, heavy muscled, red Lotto son is somewhat of an outcross in the red Simmental world. There's never been many red Lotto's and 148H going back to a Black Joker cow for a mother is a bonus. There's lots of opportunity in this calf, it will be interesting to see who his new owner is.

HOMO POLLED. Our only Red Century bull in this year's sale but he is a good one. I would rate him high in our bull pen. And he is mothered by one of our favorite cows that possesses a great udder. This is the third straight year she brings to town one of her progeny. In the 2019 bull sale a good Brooks son sold to Reitan Holdings and in last year's sale a full sister to 173H sold to Albrecht Farms in Alberta. This mid-February, Century sired bull is deep, thick, soggy, great haired and structurally sound. He would be one to look up sale day.

NON DILUTER. We test all the Fullblood bulls for the diluter gene. The reason being that if they carry the diluter gene and you breed black cows to them you could get a small percentage of greys or rat tails. If they are non diluters bred to black cows you'll get mostly blacks and some reds and, hopefully, some baldies with the Fullbloods. If your cows are all black Angus you should get mostly all black or black baldies. We just want to be upfront with you so there are no surprises when buying these Fullblood bulls. There's no problem with the red cows as they will be red or red baldies. All our Fullblood bulls tested non diluter. Now for 24H, he is sired by a Sunville Copper son we purchased out of the Schweitzer dispersal in the fall of 2019. He was the high selling fullblood bull and his mother the high selling Fullblood cow, both full Fleckvieh. The Connor bull really calved easy for us and I think could have been used on heifers. His son, 24H, could also, I think, be used on heifers. He had an 82 lb birth weight, a 282 day gestation, was born unassisted from a first calf heifer, and is really smooth made.

NON DILUTER. A really good Guerrero son out of a beautifully uddered, first calving, French Attack daughter. These Attack daughters all have excellent udders. 63H is smooth made, has good muscle, an 80 lb birth weight and was born unassisted. Another candidate that might work in the heifer pen.

IPU POLLED ELEVATION 64H

POLLED. NON DILUTER. This polled Elevation son we are really high on. Not the best picture in the world but when you see him in the flesh you'll be impressed. You get behind him and he's big topped and has lots of muscle and shape. He's deep and soggy, smooth polled and dark cherry red. His mother is a good uddered Rocket daughter who just had a full sister to 64H on January 20th. Another good looking calf. We think this bull has a lot of opportunity ahead of him. We will probably collect some semen on him for in herd use for ourselves. The Fullblood world is working hard on the polled gene and we think this young Elevation son will add quality to the polled Fullbloods.

34

IPU 341A'S FRENCH ATTACK 68H

NON DILUTER. A really exciting French Attack son off an excellent Tacoma cow that Jay Good purchased for us as a heifer calf from Ricochet Stock Farms, AB. She is a producer! In our 2019 Simmsational sale her bred heifer, a full sister to 68H, sold to Virginia Ranch for \$16,000. She was a standout. Her 2019 heifer is one of our feature, young, Fullblood heifers in our herd. And now this awesome French Attack son. And with that she went into our donor program this past year and we have several French Attack embryos off her. 68H is dark cherry red, goggle eyed, deep, thick and super attractive.

 VIRGINIA'S LORETTA 2ND

POLLED. NON DILUTER. A feature polled Fullblood bull that we think is a standout. He's got style to burn, is the heaviest muscled bull in the pen, is soggy and deep and is super stylish. His mother is a Westgold Standout daughter that knows how to raise them. Her first two daughters are in the herd, her third daughter just sold in Simmsational 2020, an Elevation daughter, for \$23,000 to Bar M Simmentals, and now this exciting Canon son. This bull has a lot to offer the polled Fullblood business. Whether he's horned or polled, he's just good. He has a modest 90 lb birth weight, weaned off at 955 lbs and has a super set of EPDs. You won't find many Fullblood bulls with an EPD profile like his.

SCURRED/POLLED. NON DILUTER. This is, again, one of our favorite bulls. He's an end of February SBSF Connor 51F son. He is a maternal brother to our high selling Fullblood bull in last year's sale, the polled IPU Elevation 35G. He sold to the great people at MI Simmentals, the Imlers, for \$28,500. Also, in our 2018 Simmsational sale, a really good French Attack daughter sold to Spruce View Acres, Steve & Tracy Kushnerik of Camrose, AB. And now this stout made, easy fleshing, dark red, heavy pigmented and great haired Connor son. He's sure one I'd be looking at come sale day.

IPU BLACK BETTS 17H

HOMO POLLED. HETERO BLACK. 17H's picture doesn't do him justice. It was a bright, sunny day when we took the black bulls pictures and the shadows were bad. This is a really good bull, long as a freight train, big topped, has lots of muscle and is great haired. And something a little different pedigreed in the black world. His mother is a really impressive black baldy, Liner 56U daughter. In last year's sale a fancy Priority daughter off 16B sold to Shannon Eaton and R Plus Simmentals. In our 2018 bull sale a good Soda Pop son sold to Morris Creek Angus, SD. If you're looking for a black bull with a little different pedigree, that is in the top 10% EPD ranking for weaning and yearling weight and is smooth and excellent haired, 17H could be the bull for you. A definite performance bull.

HOMO POLLED. HETERO BLACK. A good, soggy, IPU Bentley 81F son out of a beautiful uddered, black, Reload daughter, We're really happy with the Bentley 81F calves, both bulls and heifers. 81F was our high selling bull in our 2019 bull sale. He was the feature bull of the sale and when the hammer came down he sold to Jay Dawn Farms, the McQuaigs, from Sexsmith, AB, for \$92,000. Jason sold the U.S. semen rights on him and several semen packs in Canada and has since sold semen packages through various sales and has the cost of the bull paid for. There's been some really outstanding progeny sell this past fall at various sales and they have sold very well. This 23H bull is made thick, has lots of capacity and spring of rib and has that herd bull look to him.

HETERO POLLED. HETERO BLACK. This is a powerful son of Bentley 81F and out of a super Lotto cow that has raised some great offspring for us. We have two of her daughters in the herd that are making their own mark including 77D, mother of the 142H red baldy bull, lot 25. She has a Bentley 630D son working at Leedale Colony in Alberta and in last year's sale her black baldy Priority daughter topped our heifer consignment selling for \$30,000 to KT Ranches and is in their donor program. And now, this stout made Bentley 81F son that's long, deep ribbed and powerful. He would sire some really good, stout steers and heifers that would be market toppers.

IPU HOOEY 40H

HOMO POLLED. HETERO BLACK. As you can tell by his name this is not Barry and Brenda's bull, it is our two youngest grandsons, Jory and Zayne's. They bought a black baldy, RJY Chrome open heifer at Simmsational from Riskan Hope Farms and had us breed her Skors High Roller. The outcome turned out very well as they got a nice, black baldy, homo polled, High Roller son. He was born unassisted at 88 lbs, has a shorter gestation of 280 days, had an actual weaning weight of 895 lbs and has an excellent set of EPDs from calving ease to weaning and yearling weights and milk and high API and TI. This could be the heifer bull you're looking for whether breeding black or red heifers and as a bonus you should get some baldies.

HETERO POLLED. HOMO BLACK. It's too bad the shadows are bad in the picture of this bull because he's really a good, moderate, thick made, Bentley son out of our super red donor cow, IPU 52N Ms Pocahontas 2Y. Bentley 49H was one of our favorites all summer, so good quartered, smooth made and stylish. The Pocahontas 2Y cow takes birth weights out of her progeny as many of her calves are in the 80s and 90s. 49H started out at a nice 90 lbs. He's a bull that I would keep a bunch of his heifer calves from as they will make great replacement females.

48

HOMO POLLED. HETERO BLACK. What a job the IPU Bentley 81F bull is doing for us. He is consistent in the type and quality he sires. 55H's Lotto mother has also done a terrific job for us. She's had six straight progeny going either to our bull sale or Simmsational, highlighted by the IPU Resolve 114D bull that was our high seller in our 2017 sale at \$46,000 selling to Deeg Simmentals and Muirhead Cattle Co. He has done quite a job for them. This Bentley 81F son, 55H, we are really high on. You get behind him and he is big topped, has a big wide butt, is deep sided, loose made and has a slap of white on his head. He had an actual weaning weight of 960 lbs, a perfect 96 lb birth weight and has a strong set of EPDs. This is a bull you'll want to see right away sale day, he won't be hard to find.

HOMO POLLED. HETERO BLACK. A nice, smooth made 81F son again out of an excellent Liner 56U daughter that's had six straight progeny and this will be the third coming to our Annual Spring Bull & Female sale. A heifer sold to Handford Simmentals, MB a herd bull for our cousins, Blake, Brad and Ryan LaBatte and now this baldy Bentley son. He's got some frame, rib and length and will add that money stripe to some of his offspring.

HOMO POLLED. HOMO BLACK. A definite calving ease prospect for the heifer pen. Wilf Davis purchased his mother for us from Dana & Megan Johns, MB as a bred heifer. A really nice made, black baldy, Cobra daughter with a really nice udder. She was bred to an OLF Odin grandson whose lineage is known for calving ease. 87H came out solid black with just a nice blaze face, No other white. He performed well too, coming off his mother at 880 lbs. He is smooth made but maintains rib and muscle shape. He has a great set of EPDs being in the top 2% of the breed for calving ease and top 10% for birth weight. He's above average in 12 of 13 traits. If you're looking for a calving ease bull that will sire all black calves and some with blaze faces, this Odin son should be looked up sale day.

HETERO POLLED. HOMO BLACK. This March 23 Bentley son has always been one of our favorites. Remember, he's only born March 23, just a little over 11 months old. He's mothered by a beautiful, black blaze face, Poker Face cow with an excellent udder. We wondered if we should bring him to the sale his being so young, but he has so many good qualities and if you're not turning your bulls out until June or July he'll be ready. He's thick, thick, deep ribbed, big topped, loose made and has lots of style. He too has a splash of white on his head and should sire some of the baldy calves that are so much in demand.

Kyron, Kelsey & Embrie Manske

Box 456, Coronach, SK S0H 0Z0

Ph: 306 267-7530

email: east.poplar@hotmail.com

www.eastpoplarsimmentals.com

Welcome to the LaBette Simmentals Bull & Female Sale with East Poplar Simmentals!

It is crazy to believe that a year has gone and we are at bull sale time again! Last year we were fortunate the bull sale was early and right before the COVID restrictions began and life as we knew it was changed. For 2021 we are planning to continue with a live sale and business as usual with the option to view and bid online through DLMS. We also have an extensive list of professional sale consultants listed at the beginning of the catalogue that can be of service if you are not able to make the sale. Or give Kyron or Barry a call for assistance and questions.

Things on the farm and with our family have been as busy as ever! Our little girl, Embrie, is 2½ years old and keeps us on our toes with her independent and sweet personality. In June Kelsey became the Community Development Officer for Coronach and in November Kyron became an RM Councillor.

We are once again excited about the pen of bulls we have on offer in the sale. A new sire group this year is the SVS Betts bulls and boy are we excited about them! The consistency and quality of the Betts calves, whether it's bulls or females, is like no other bull we've ever used. We also have a great group of Lieutenant bulls this year and they continue to impress us. We have some Lieutenant daughters milking now and they have beautiful udders and are turning into real impressive females. On the black side of the pen we also have a new sire group, the East Poplar Payload group. Payload was our high selling bull in the 2019 sale, selling to Townview Simmentals at Shaunovan. He has really established himself as a true performance bull, adding stretch and frame to his calves. The rest of the blacks are mainly out of bulls we have more experience with, Capacity and Captain Black. We have used these bulls for a couple of years now and feel they have a lot of maternal value to add as well and extra performance.

We feed these bulls to work for you for the long term. We are in the breeding business, not the feeding business. We want these bulls to thrive under ideal conditions, not require ideal conditions. After a two stage weaning process, the bulls are sent back out onto swath grazing for as long as possible. We really like the exercise the bulls get when doing this and feel it really helps transition and grow them before coming in on feed. We feed free choice hay, oats, and a protein supplement which is made up of pellets and corn. We don't feed our bulls any barley in their ration as we want to ensure we don't run into any feet issues in the future. I refuse to trim feet on a yearling bull and we guarantee these bulls will never have their feet touched so what you see is what you get. It's very important to us to be upfront and honest about how these bulls are raised and displayed and we enjoy talking about our program with anyone who may have any more questions.

All the bulls are on our herd health program and will be semen tested and guaranteed. Delivery is free of charge, but we do ask that any bulls that come back to our place for wintering are insured. Most of the bulls in our offering have been homo polled and homo black tested.

Visitors are always welcome and the bulls are available to be viewed on the farm at any time or give us a call to discuss any of our offering. Videos of the bulls are available at www.eastpoplarsimmentals.com. Thank you to Barry and Brenda for having us as their guest consignors. We are honoured to be a part of the sale.

Hope to see you all March 5th at Johnstone Auction Mart in Moose Jaw, SK or join us online with DLMS!

EAST POPLAR BETTS 21H

HOMO POLLED. This is the type of bull that we strive to raise here. To say I've been excited about this guy would be a big understatement. Everyone has those calves that are the standouts at a young age, but this guy was in a league of his own! I have never seen a calf with as much mass at such a young age as 21H. It has really been exciting to watch him develop and turn into the impressive individual he is today. When you get behind him you will be blown away by his wide hip and how he carries that through his loin and right across his top. He's big middled, bold ribbed and ties this nicely into his shoulder. He is backed by a solid Horizon cow who has a nearly perfect udder and is the type of female we try to make more of every year.

HETERO POLLED. 10H is a moderate framed baldie bull that is real balanced and an interesting individual. He has a real presence about him and gets your attention as you walk through the pen. You have to admire the shape and muscle expression in this Lieutenant son. His dam is a moderate framed baldie cow who has a real nice udder and is a low maintenance type of cow. If you are looking for a bull to knock a frame size off of some cows and add a little chrome, look no further.

HOMO POLLED. If you're in the market for a heifer bull this is your bull. Born at just 69 lbs and his calving ease and birth weight EPDs in the top 4% and 10% respectively he's definitely got the numbers. When you analyze this guy he's also the right type, being real smooth shouldered and refined through his front end. The Pride calves are born easy and get up and go.

HOMO POLLED. 70H is a direct son of the 47W cow who has done such a great job for us here. She is a direct daughter of our Ribeye 195P bull who was the bull that got us into the purebred business in the first place. The 195P bull was a son of the great 105L cow who was a big time producer for Barry in her lifetime with many high sellers in her long career. 70H is smooth in his lines and will pack a maternal punch with the likes of Deputy, Horizon, Ribeye, Red Teddy and 56U in his pedigree. If you are in the market for a bull to make you a pen full of top end replacements, put a circle around this guy's lot number.

EAST POPLAR LINER 31H

HOMO POLLED, HETERO BLACK. This bull comes to the top of our black division with his overall mass, thickness and performance. The amount of shape and body this guy possesses is truly impressive. He also has an outstanding genetic profile being out of one of our top producing cows, Erixon Lady 38B, and Springcreek Liner 56U. We showed a maternal brother in 2019 at Manitoba Ag Ex where he was Reserve Champion Bull Calf and later sold as our high selling bull in 2020 to Tom & Wanda Howe. 31H is a bull who we plan on using in our own program going forward.

SVS BETTS 808F PTG1235797
 WFL RED SAGE 506C

Here is a special offering of IPU 52N Ms Pocahontas 2Y embryos sired by two of the most talked about Simmental bulls in the breed, R Plus Yuma 9087G and SVS Betts 808F.

Yuma is the \$150,000 high selling bull at the R Plus bull sale in 2020. He was one of the most talked about black bulls to sell this past spring. There were many syndicates put together to go after him. It was exciting for ourselves and Circle 7 Ranches, the Oberles, to be winning bidder. The next day we sold 50% semen interest in him to reputation breeders Rancier Farms and Maxwell Simmentals. He's homo polled and hetero black and as we write this footnote we have Yuma calves on the ground. They're coming easy, have short gestations and look very sharp AND we have some red ones.

What can we say about SVS Betts 808F, his first calf crop is outstanding, there's no other bull that puts muscle and rib in his progeny like he does. He's a champion show bull and a champion sire of many great progeny whether males or females. And now on to Pocahontas 2Y, our pick of our cows when Meadow Acres purchased a very large package of cows from us. She is sired by the legendary Springvreek Liner 56U bull and her donor dam was sired by Hart Red Chief 242J.

Someone asked me the other day if I could pick a bull(s) that I used over the years, who would be my favorites. It didn't take me long to answer Hart Red Chief and Springcreek Liner 56U. We think there's a lot of opportunity in these two matings of the great Pocahontas cow and these young up-and-coming Simmental stars.

Jenna on her 13th birthday- a Coyote and a Whitetail Buck.
 A birthday she'll never forget.

Brodyn clipping Simmsational
 heifer

Drone photo taken by Brodyn of LaBatte Simmentals farm yard

FOREWORD

LaBatte Simmentals will be consigning 12 open, purebred heifers in this year's sale again, including 6 black opens and 6 red opens. They are represented by some of our leading sires: WHEATLAND BENTLEY, IPU BENTLEY 81F, SPRINGCREEK LINER 56U, SVS BETTS 808F, and MI MR EXCEED 51F. We haven't tested these heifers for homozygous polled but we know by parentage which ones are for sure. If you have any questions about these heifers before the sale be sure to give us a call and we would be glad to go over them with you. Or, better yet, come and have a look at them before the sale. We would be glad to show you them and their brothers in the bull pen.

A special picture of two of the best cattlemen I've ever known, Wilf Davis and Laurent Maguet along with his wife Lorraine of Rendezvous Farms.

There's about 345 years of experience in this picture.

A beautiful Bentley heifer out of a Springcreek Lotto daughter going back to the Ultra Temptress 12R cow that we flushed so successfully. The old 12R cow was one of the best cows to walk our pastures, she was so long and big middled, had a great udder and had that front pasture look about her. This 32H is going to carry on the Temptress legacy. She's really pear shaped, great haired, attractive and is going to be a brood cow in the making.

IPU 21E'S MS BLUE MOON 75H

HOMO POLLED BY PARENTAGE. The dam of this super good, baldy heifer was purchased at Friday Night Lights by ourselves and Circle 7 Ranch, the Oberles, for \$32,000. That's how much we thought of her. Deegs bred her to WHL Limitless for us and then we IVF'd her while pregnant to Liner 56U, resulting in 5 embryos. We sold her Limitless bull calf in last year's sale for \$10,500 to Doug Thoms, Wild T Farms at Humboldt, SK and got three Liner 56U daughters from the embryos. We bred Blue Moon to Bentley and she raised this beautiful, stylish heifer that we're offering. She's a baldy like her mother, has lots of volume, is great haired and, if you wanted to put a halter on her, would be very competitive in the show ring.

IPU MS RASPBERRY 14H

HOMO POLLED BY PARENTAGE. A beautiful daughter of SVS Brooks 669D and an excellent baldy, IPU Red Deputy 25C daughter. This heifer is dark cherry red, has brood cow written all over her, is angular, deep, soft made, homo polled and just plain good. She will make an excellent cow down the road, possibly a donor cow.

HOMO POLLED BY PARENTAGE. We purchased the mother of this good heifer at the SimPower sale as a bred heifer from Westway Farms. She was our pick of the red bred heifers in the sale. She was bred to WFL Avalanche and did she give us a great calf, a cherry red bull calf, that we sold in last year's sale for \$18,500 to the good people at Leewood Ranches. Now this beautiful made Bentley daughter that has a little splash of white on her head, has tons of volume and is good haired. She really has to be seen to be appreciated. She's been one of our favorites all year long.

HOMO POLLED BY PARENTAGE. Our grandson, Brodyn LaBatte, is a big help around the farm, both grain farming and helping Grandpa with the purebred side of the cattle. He's in grade 11 in school, comes out in the winter after school every day and helps on the weekends. In 2017 Brodyn's mother gave him a heifer for helping on the farm. It was a pretty good gift as he bred her IPU Dillinger 80B and she produced a \$24,750 bull for him, selling to Kunkel Simmentals in ND. Then she had a really good Brooks heifer who just had her first calf as I write this and now this good, moderate, easy doing Betts daughter that's broody, stylish and homo polled.

An attractive Black Gold Approval 71E daughter out of a first calf Red Deputy daughter. We've been really happy with Approval. He calves well, sires them dark red and leaves us good bulls and heifers. He's in the top 4% for the breed for both calving ease and birth weight. This fancy 109H heifer is dark red, great haired, really nice fronted and has lots of capacity. She should make a really nice young cow with a great udder.

HOMO POLLED BY PARENTAGE. This picture doesn't do Shamrock justice as she's a really good heifer with lots of body and style. This red Exceed heifer and the black Exceed heifer, lot 87 are both really good. Their sire is the really thick made, hetero black, SVS Brooks son. This young, very attractive March heifer has always been one of our favorites with her dark red color, great hair and broodiness. She ranked 4th out of 39 in her contemporary group for adjusted weaning weight.

It has been a pleasure working with such a well-established operation as LaBatte Simmentals. Only a handful of people would travel down as many driveways as Barry has in Western Canada, searching for their next herd bull. The quality of bulls in this year's offering runs deep. The cow herd utilizes a customized mineral program that is balanced throughout the year. This supports proper bull calf development from a young age. The bull feeding program is built to maximize forage utilization and gut health; they are developed on grass with their moms and then moved onto a balanced ration that promotes lean muscle. The bulls are challenged with a foraged based diet to help them develop to their genetic potential. Organic minerals are used to ensure proper immune function and overall health. LaBatte Simmentals use a total nutrition program on their entire operation, ensuring optimal cattle performance. If you have any questions about the nutrition of the sale bulls, please feel free to call. Best of luck on sale day!
